

## 600mm Dia Extractor Bags

### Key Information

---

Our heavy duty waste sacks / extractor bags are manufactured here in the UK.

**Pack Quantity:** 50 per box (25 pack boxes available)

**Ideal for collection of:** Large amounts of wood chips, sawdust and general industrial applications.

**Thickness:** 500 gauge equivalent

**Capacity:** 250ltrs

Other sizes available: 400mm and 500mm extractor bags.

**Key Features:**

- Thick and strong (500 gauge equivalent)
- Double seal on bottom
- 100% Water proof
- For general waste collection and dust extraction
- Perfect for wood chips, sawdust and general industrial applications
- UK Manufactured
- Discounts when buying bulk
- Supplied as boxes of 50 and 25

\*Bag connection straps sold separately\* If you have any questions about this product or if you do not find what you are looking for please feel free to call us on 03456 800 696 and we will be happy to help.

## 600mm Dia Extractor Bags

### Spigot sizes

**Spigot size diameter Ø600**

**Max circumference  
measurement of your bin  
= 1885mm or 74"  
(Distance around the  
outside of the spigot)**

Spigot Diameter size Calculation:  
Flat Size 38" or 965.2mm X 2 = 1930.4mm  
Circumference  $1930.4 / \pi (3.142) = 614.4\text{mm}$   
Tolerance +/- 3% = Between  
Ø596 - Ø632.8mm

3% Tolerance on the bag dimensions is calculated from the "Average Size" of 965.2mm or 38".

We call this the 600mm bag as 596mm is the smallest size we produce within our tolerance. If the bags are on the larger size then a simple fold under the bag connection strap will suffice.

The average size of the bags will be:  
Opening at the top 965.2mm x 2 = the Circumference  
 $(1930.4) / 3.142 = \text{Ø}614.4\text{mm}$

The Maximum size of the bags will be:  
Opening at the top 994.2mm x 2 = the Circumference  
 $(1988.4) / 3.142 = \text{Ø}632.8\text{mm}$

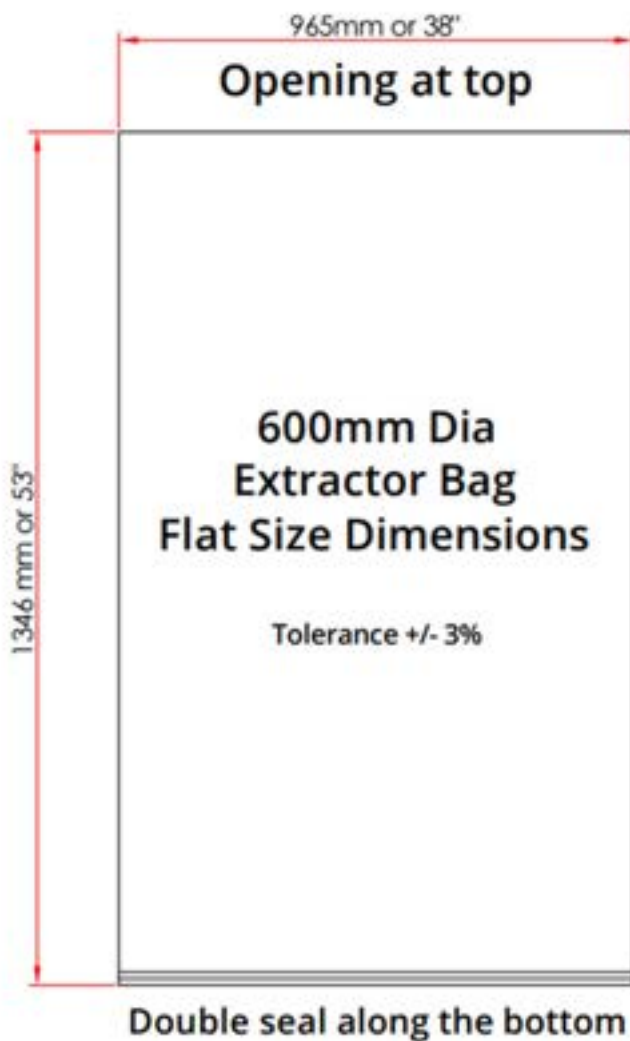

The Smallest size of the bags will be:  
Opening at the top 936.2mm x 2 = the Circumference  
 $(1872.5) / 3.142 = \text{Ø}596\text{mm}$

If the bags are out side the range of 596-614.4mm please let us know. There is a 3% Tolerance on the 53" length too. - See page 3 for information.

# 600mm Dia Extractor Bags

## Bag Length

### Bag length for the 600mm Dust extractor bags

**Average length of the bags**  
1346mm or 53"

The length of the bags comes with a 3% tolerance also.

This means that the length of the bags will be between

**Minimum length of the bags**  
1305.6mm

**Maximum length of the bags**  
1386.4mm

If your bags are outside this range and it becomes an issue let us know.
