

GEOVENT MINI arm is a handy point extraction arm for extracting dry application such as wood waste, dust and chips. The MINI arm comes with a universal mounting bracket that can be mounted on either vertical (e.g. wall) or horizontal surfaces (e.g. table or base cabinet). The arm consists of 5 friction joints, which ensure easy and effortless positioning of the hopper.

Construction:

Mounting bracket: Powder-coated steel plate RAL 1007 yellow. The bracket can be rotated 360°.

Funnel: Lightweight aluminum funnel in the dimensions: $\varnothing 80$, $\varnothing 100$, $\varnothing 125$ mm in powder-coated RAL 1007 (yellow).

Arms and friction joints: powder-coated 20x10 mm ALU profile, which is connected via friction discs and disc springs.

Capacity: Up to 800 m³/h depending on the desired air speed.

MINI arm $\varnothing 80$, $\varnothing 100$ & 125 mm
