3	Inner liner	Cartridge	201 mm
4	Bottom end cap		
5	Media pack		
6	Top end cap		
7	Strap		
8	Venturi		

CARTRIDGES

Cartridges of 2.5m² filtration area are fitted to VS10, 15 and 20 units. Whereas the VS14, 21 and 28 units are fitted with cartridges of 3.5m² filtration area

The cartridges are manufactured to high tolerances from spun-bonded polyester material. This incorporates wide pleats and a star-shaped moulded base. The cartridge sits through holes in the seal frame, a sealing ring being clamped between cartridge flange and seal frame, producing a dust tight seal.
